2.	iv)	<p><b>How has plastic spoiled the land?</b></p> <p><b>Ans:</b> The indefinite period of time that it takes for the average plastic bag to breakdown can be literally hundreds of years. Every plastic bag that ends up in the woodlands of the country threatens the natural progression of wildlife. The accumulation of plastics prevents the sunlight from entering the soil and thus destroys the beneficial bacteria necessary for soil fertility. Plastic is one of the few modern chemical materials that is not biodegradable. That is why it can remain in a landfill for millions of years and affects the crops. Research proves that one plastic bag, littering in the landfill, has the potential to unintentionally kill one animal every three months due to intake or inhalation. Plastic waste blocks drains and gutters, stopping the flow of rain water and causing an overflow that becomes the breeding ground for germs and bacteria causing many diseases. Thus plastic has spoiled the land in many ways.</p> <p><i>(Note: Answer can vary.)</i></p>	04
