

WINTER-17 EXAMINATION  
Model Answer

Subject Title: Stoichiometry

Subject code : 17315

Page 1 of 18

**Important Instructions to examiners:**

- 1) The answers should be examined by key words and not as word-to-word as given in the model answer scheme.
- 2) The model answer and the answer written by candidate may vary but the examiner may try to assess the understanding level of the candidate.
- 3) The language errors such as grammatical, spelling errors should not be given more Importance (Not applicable for subject English and Communication Skills).
- 4) While assessing figures, examiner may give credit for principal components indicated in the figure. The figures drawn by candidate and model answer may vary. The examiner may give credit for any equivalent figure drawn.
- 5) Credits may be given step wise for numerical problems. In some cases, the assumed constant values may vary and there may be some difference in the candidate's answers and model answer.
- 6) In case of some questions credit may be given by judgement on part of examiner of relevant answer based on candidate's understanding.
- 7) For programming language papers, credit may be given to any other program based on equivalent concept.

	<p>For 4 moles of nitrogen fed, theoretical requirement of hydrogen is 12 kmoles. But hydrogen fed is only 10 kmoles. Therefore nitrogen is not the limiting component.</p> <p>Therefore Hydrogen is the limiting component and <b>Nitrogen is the excess component.</b></p> <p><math>N_2</math> fed = 4 kmoles</p> <p>Theoretical requirement nitrogen corresponding to <math>N_2</math> fed 4 kmoles = 3.33</p> <p>% excess <math>N_2</math> = <math>(\text{kmoles } N_2 \text{ fed} - \text{kmoles } N_2 \text{ theoretical} / \text{kmoles } N_2 \text{ theoretical}) * 100</math></p> $= (4 - 3.33 / 3.33) * 100$ $= \mathbf{20.12\%}$	1 1 1 1
6-e	<p>Basis: 1000 kg wet ONA</p> <p>Overall balance is</p> $1000 = X + Y$ <p>Balance for solid</p> $0.90 * 1000 = 0.995 * Y$ $Y = 904.52 \text{ kg}$ $X = \mathbf{95.48\text{kg}}$ $\text{Water removed} = \mathbf{95.48\text{kg}}$	1 1 1

WINTER-17 EXAMINATION  
Model Answer

Subject Title: Stoichiometry

Subject code :

17315
