#### MACHINE TOOL DESIGN

Course Code: 316358

**Programme Name/s**: Production Engineering

: PG **Programme Code** Semester : Sixth

**Course Title** : MACHINE TOOL DESIGN

Course Code : 316358

#### I. RATIONALE

This core production Engineering course focuses on machine tool design fundamentals, equipping production engineering students with the skills to develop efficient machine tool elements for manufacturing. It requires prior knowledge of Theory of Machines, Strength of Materials, and Mechanical Engineering Materials to ensure students can design effective machine tool elements to meet industry needs.

#### II. INDUSTRY / EMPLOYER EXPECTED OUTCOME

The aim of this course is to attain the following industry identified outcome through various teaching learning experiences: Student will be able to design basic machine tool elements.

# III. COURSE LEVEL LEARNING OUTCOMES (COS)

Students will be able to achieve & demonstrate the following COs on completion of course based learning

- CO1 Identify the general requirements for machine tool design and related processes.
- CO2 Evaluate machine tool structure profiles, guideways and slideways.
- CO3 Evaluate various spindle support designs considering structural diagrams for machine tool.
- CO4 Diagnose the causes of vibration in given machine tools.
- CO5 Suggest ergonomic and aesthetic considerations in the design of machine tools.

#### IV. TEACHING-LEARNING & ASSESSMENT SCHEME

#### Total IKS Hrs for Sem. : Hrs

Abbreviations: CL- ClassRoom Learning, TL- Tutorial Learning, LL-Laboratory Learning, SLH-Self Learning Hours, NLH-Notional Learning Hours, FA - Formative Assessment, SA -Summative assessment, IKS - Indian Knowledge System, SLA - Self Learning Assessment

Legends: @ Internal Assessment, # External Assessment, \*# On Line Examination, @\$ Internal Online Examination

#### Note:

- 1. FA-TH represents average of two class tests of 30 marks each conducted during the semester.
- 2. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
- 3. If candidate is not securing minimum passing marks in SLA of any course then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.
- 4. Notional Learning hours for the semester are (CL+LL+TL+SL)hrs.\* 15 Weeks
- 5. 1 credit is equivalent to 30 Notional hrs.
- 6. \* Self learning hours shall not be reflected in the Time Table.
- 7. \* Self learning includes micro project / assignment / other activities.

#### V. THEORY LEARNING OUTCOMES AND ALIGNED COURSE CONTENT

MSBTE Approval Dt. 04/09/2025

LLO 11.2 Prepare a detailed report highlighting the impact of ergonomic and aesthetic considerations on machine performance and user experience. | 11       | Ergonomic and aesthetic analysis of Lathe, Milling, and Drilling machines available in the Workshop. | 4              | CO5             |

# Note: Out of above suggestive LLOs -

- '\*' Marked Practicals (LLOs) Are mandatory.
- Minimum 80% of above list of lab experiment are to be performed.
- Judicial mix of LLOs are to be performed to achieve desired outcomes.

# VII. SUGGESTED MICRO PROJECT / ASSIGNMENT/ ACTIVITIES FOR SPECIFIC LEARNING / SKILLS DEVELOPMENT (SELF LEARNING)

### Micro project

- Conduct a comparative study of the Lathe and Milling machine structures available in the workshop, focusing on their profiles and materials.
- Document the specifications of spindles for the Lathe, Milling, and Drilling machines in the workshop.
- Prepare a detailed report on the ergonomic and aesthetic considerations of the Lathe machine.
- Compare the cutting tool holding arrangements in a General Lathe, Milling, and Drilling Machine.

# Assignment

- Sketch various slideway profiles of any two machine tools available in the workshop.
- Draw the structural diagram and ray diagram of a Lathe machine.
- Prepare a Comprehensive Report on the Impact of Lubrication, Temperature, Vibration, and Machining Forces on

MSBTE Approval Dt. 04/09/2025

Course Code: 316358

#### MACHINE TOOL DESIGN

Machine Tool Performance and Guideway Wear.

#### Note:

- Above is just a suggestive list of microprojects and assignments; faculty must prepare their own bank of microprojects, assignments, and activities in a similar way.
- The faculty must allocate judicial mix of tasks, considering the weaknesses and / strengths of the student in acquiring the desired skills.
- If a microproject is assigned, it is expected to be completed as a group activity.
- SLA marks shall be awarded as per the continuous assessment record.
- For courses with no SLA component the list of suggestive microprojects / assignments/ activities are optional, faculty may encourage students to perform these tasks for enhanced learning experiences.
- If the course does not have associated SLA component, above suggestive listings is applicable to Tutorials and maybe considered for FA-PR evaluations.

# VIII. LABORATORY EQUIPMENT / INSTRUMENTS / TOOLS / SOFTWARE REQUIRED

| Sr.No | Equipment Name with Broad Specifications  | Relevant<br>LLO<br>Number |
|-------|---|---------------------------|
| 1     | Centre lathe machine. (Length between centers 1000 mm, swing 500 mm,) Chucking Diameter Range 25-200 mm,  | All                       |
| 2     | Milling machine, minimum 500 mm longitudinal traverse, with required indexing head, set of work holding devices, cutting tools, accessories, and tool holders.  | All                       |
| 3     | CNC Turning 250 with standard accessories and multi controller changing facility with simulated control panel and related software. Training or Productive type minimum diameter 25 mm, Length 120 mm with ATC, (Suggested)                                   | All                       |
| 4     | CNC Milling 250 with standard accessories and multi-controller changing facility with simulated control panel and related software. Training or Productive type-X axis travel - 225 mm, Y axis travel - 150 mm, Z axis travel - 115 mm, with ATC. (Suggested) | All                       |
| 5     | Drilling Machine (drill diameter up to 40 mm).  | All                       |

# IX. SUGGESTED WEIGHTAGE TO LEARNING EFFORTS & ASSESSMENT PURPOSE (Specification Table)
