- Instructions* –
- (1) All Questions are *Compulsory*.
 - (2) Answer each next main Question on a new page.
 - (3) Illustrate your answers with neat sketches wherever necessary.
 - (4) Figures to the right indicate full marks.
 - (5) Assume suitable data, if necessary.
 - (6) Use of Non-programmable Electronic Pocket Calculator is permissible.
 - (7) Mobile Phone, Pager and any other Electronic Communication devices are not permissible in Examination Hall.

Marks

- 1. Attempt any FIVE of the following: **10****
- a) State functions of range sensor.
 - b) List various methods of robot programming.
 - c) Classify end effectors.
 - d) State the types of robot maintenance.
 - e) State any four End effector commands.
 - f) List various future technologies of robot.
 - g) State functions of force sensor.

P.T.O.

- 2. Attempt any THREE of the following:** **12**
- a) Sketch symbol of various joints used in robotic systems.
 - b) Explain edge detection and its procedure.
 - c) Write short note on teach pendant.
 - d) Explain applications of Robot in spot and continuous arc welding.
- 3. Attempt any THREE of the following:** **12**
- a) State various capabilities and limitations of lead through programming methods.
 - b) Enlist chronology of development related to robot technology.
 - c) Explain various applications of Robots in manufacturing industries.
 - d) State standard notations symbols used for various joints.
 - e) Explain future mechanical design features may use in robots.
- 4. Attempt any THREE of the following:** **12**
- a) State the need of telepresence and related technologies.
 - b) Explain applications of Robot in automated assemblies.
 - c) Using VAL language, discuss the basic commands and explain the structure of the program for a typical pick and place operation.
 - d) Explain feature extraction techniques.
 - e) Discuss advantages and disadvantages of using robots in industry.
- 5. Attempt any TWO of the following:** **12**
- a) Explain applications of Robot in automated assemblies.
 - b) Write program for inspection of bolt. (Assume all necessary dimensions.)
 - c) Explain system integration and networking approach may use in robot.

6. Attempt any TWO of the following:**12**

- a) What is edge detection and explain the procedure?
 - b) Write VAL program for inspecting an OBJECT into a box by approaching 45 mm above the object by moving to an intermediate point 'P' along a straight line and approaching the box 70 mm from above and finally setting the gripper 25 mm above the box.
 - c) Explain different robot components.
-
