- Instructions (1) All Questions are Compulsory.
 - (2) Answer each next main Question on a new page.
 - (3) Illustrate your answer with neat sketches wherever necessary.
 - (4) Figures to the right indicate full marks.
 - (5) Assume suitable data, if necessary.
 - (6) Use of Non-programmable Electronic Pocket Calculator is permissible.
 - (7) Mobile Phone, Pager and any other Electronic Communication devices are not permissible in Examination Hall.
 - (8) Use of Steam tables, logarithmic, Mollier's chart is permitted.

Marks

1. Attempt any FIVE of the following:

10

- a) Enlist the modern development of draw frame.
- b) State the objectives of rotor spinning.
- State the operating principle of air-jet spinning.
- Enlist the applications of friction spun yarn.
- Classify the advanced spinning systems.
- State the operating principle of air-vortex spinning. f)
- List the properties of wrap spun yarn.

| | | Ma | rks | | | |
|----|----|---|-----|--|--|--|
| 2. | | Attempt any THREE of the following: | 12 | | | |
| | a) | Describe with neat sketch working of Repco spinning. | | | | |
| | b) | State the influence of machine process parameters on air-vortex spun yarn. | | | | |
| | c) | State the modern developments in ring frame. | | | | |
| | d) | Discuss the following parts of rotor spinning: | | | | |
| | | i) Rotor | | | | |
| | | ii) Opening roller. | | | | |
| 3. | | Attempt any THREE of the following: | 12 | | | |
| | a) | State the modern developments in comber. | | | | |
| | b) | Describe with neat sketch air-vortex spinning. | | | | |
| | c) | Calculate production of rotor spinning machine in kg/shift with following data; | | | | |
| | | i) Rotor speed = $1,15,000 \text{ rpm}$ | | | | |
| | | ii) Twist multiplier = 4.7 | | | | |
| | | iii) Yarn count = 14 ^s Ne | | | | |
| | | iv) Efficiency = 90% | | | | |
| | | v) No. of heads = 120. | | | | |
| | d) | Draw and explain the structure of air-jet spun yarn. | | | | |
| 4. | | Attempt any THREE of the following: | 12 | | | |
| | a) | Summarise the features of modern card. | | | | |
| | b) | State the effect of opening roller speed, rotor speed and rotor diameter on yarn structure and quality. | | | | |
| | c) | Describe with neat sketch SIRO spinning process. | | | | |
| | d) | Give the properties and end use applications of air-jet spun yarn. | | | | |
| | e) | State the modern developments in DREF spinning machine. | | | | |

22675 [3]

| | | | Marks |
|----|----|---|-------|
| 5. | | Attempt any TWO of the following: | 12 |
| | a) | Describe with neat sketch Rotor Spinning machine. | |
| | b) | State the modern developments in speed frame. | |
| | c) | Describe with neat sketch of PLYFIL spinning process. | |
| 6. | | Attempt any TWO of the following: | 12 |
| | a) | With neat sketch describe the working of DREF-3 spinning. | |
| | b) | Describe with neat sketch Air-Jet spinning process. | |
| | c) | Discuss the following points on rotor spinning machine: | |
| | | i) Navel | |
| | | ii) Trash removal | |
| | | iii) Yarn formation and twist insertion | |
| | | iv) Yarn withdrawal tube. | |
| | | | |
