- Instructions :**
- (1) All Questions are *compulsory*.
  - (2) Answer each next main Question on a new page.
  - (3) Illustrate your answers with neat sketches wherever necessary.
  - (4) Figures to the right indicate full marks.
  - (5) Assume suitable data, if necessary.

**Marks**

**1. Attempt any FIVE of the following :**

**10**

- (a) State four pre-treatments given to 100% cotton, woven fabric.
- (b) List the faults present in grey fabric.
- (c) Define the term 'percentage shade'.
- (d) State any four properties of Sulphur dyes.
- (e) List out different methods of dyeing polyester using disperse dyes.
- (f) State objectives of printing.
- (g) Enlist any four novel printing methods.

**2. Attempt any THREE of the following :**

**12**

- (a) Describe method for Enzyme desizing of cotton with its merits and demerits.
- (b) Explain with neat diagram, working of jiggar machine.
- (c) Describe dyeing of 100% polyester fabric of H.T.H.P. dyeing method.
- (d) Differentiate between dyeing and printing.

**3. Attempt any THREE of the following : 12**

- (a) Describe with neat sketch, construction and working of gas singeing machine.
- (b) Describe dyeing procedure for 100% polyester fabric by using thermosol method.
- (c) Describe procedure for direct style printing of cotton by using reactive dye.
- (d) Describe the process for magic printing on fabrics.

**4. Attempt any THREE of the following : 12**

- (a) Explain mechanism of hydrogen peroxide bleaching method of cotton.
- (b) Describe method for evaluation of the efficiency of scouring.
- (c) Suggest process parameters and print paste recipe for direct printing of polyester with disperse dye.
- (d) Describe the procedure to create fluorescent prints effect on garment. State the salient features of fluorescent printing.
- (e) Suggest the process and parameters for flock printing of cotton.

**5. Attempt any TWO of the following : 12**

- (a) A fabric rolls of 100 m long and 150 cm width contain following defect :  
2 defects up to 3 inches, 2 defects from 3-6 inches, 1 defect from 6-9 inches, 1 defect above 9 inches. Decide fabric should be accepted or rejected if a selection criterion is 20 point/100 m<sup>2</sup>.
- (b) Describe dyeing of silk with acid with process parameters.
- (c) Suggest process parameters and dyeing procedure to get 'cross dyeing' on polyester/cotton blended fabric.

**6. Attempt any TWO of the following :**

**12**

- (a) Suggest process parameter for dyeing of cotton with cold brand reactive dyes.
  - (b) Explain the important print paste ingredients and their functions used for cotton fabric printing.
  - (c) Explain “Brasso printing” with typical print paste formulations.
-
